

Nacogdoches County Chamber of Commerce
Leadership Nacogdoches
Education Day

sponsored by Hydrex Drone Division

Thursday, November 15

The purpose of this day is to explore public and private education across Nacogdoches County, pre-kindergarten through grade 12. As you know there are seven county independent school districts, one city independent school district, a county Head Start Center, a university charter elementary school, several private schools, and a home school consortium. Across this day, you will visit a county school, highlighting a career and technical education initiative, a city middle school, and a private school, and you will consider state demographer data related to population shifts and educational projections.

You may be asked to provide your TX driver's license when entering public schools as per state law.

We may need to carpool from site-to-site. Please meet at the Chamber by 8 AM to coordinate transportation for the day. We will end our day at the Chamber.

Judy A. Abbott, Ph.D., Chair, Education Committee
Dean & Professor, SFA
